OverviewApplication

At [Super.com](#), we're on a mission to help people save more, earn more, and get more out of life. That goes for both our customers and our team.

We are more than a [fast-paced, high-growth tech company](#); we care about our people and take career progression seriously. This is your career and our aim is to supercharge it [through the people, the work, and the programs](#) that fuel who we are.

At [Super.com](#), we celebrate and reward our high performers. [Follow this link to learn more about our Internship Scholarship Program](#) and how you can further benefit from a work engagement with us. We have successfully hosted over 100 engineering internships, and always have our interns working alongside our full-time developers on core projects.

Term: This internship is for the Winter Term: **January 4 - April 30, 2027**

What's it like to intern at [Super.com](#)?

Interning at [Super.com](#) is an exciting chance to dive into the world of tech and startups, work on real projects, and learn a ton along the way. From day one, interns are fully part of the team - contributing to work that actually ships and gets used. It's a fast-moving yet super supportive environment where you're encouraged to ask questions, try new things, and grow through hands-on experience. Many interns say it's the most they've learned in such a short time! Even though we're remote, the culture is fun, collaborative, and well-connected- you'll be included in team meetings, Slack chats, and social events, so you'll never feel like you're doing this alone.

About this role

We are looking to hire Software Engineering Interns with at least 8 months of experience to join our engineering team. It is a really exciting and technically challenging time for our engineering teams as we focus on 3 development pillars: travel, fintech, and a superapp membership to unite them along with other savings and earnings use cases. Between them, our services handle 1000s of requests per second, ingest over 1TB of data per day and process over \$1MM per day in sales, while maintaining a 99.9+% uptime.

What you'll be working on:

- Ship technically challenging projects end-to-end in a fast-paced, iterative environment
- Have the opportunity to very meaningfully propel the business forward, and recognize the impact of your work on the company's business metrics and user experience
- Own features, services, caches, and databases, including: deployment, monitoring, debugging, and testing
- Write production-ready, well-tested code in your first week
- Be data-driven and close to the customer, performing experiments for nearly everything you launch
- Work on a combination of frontend and backend work across multiple services and codebases

Our Tech

- We use a state of the art architecture powered by microservices written primarily in Python (FastAPI). We use React (with TypeScript) on the frontend, and Postgres/Redis for storage and caching
- We use Gitlab for version control and CI/CD, and our infrastructure is hosted on AWS (using Kubernetes). It takes under 30 minutes for merged code to reach production
- We invest heavily in monitoring and automated alerting using Datadog
- We use Amplitude client-side metrics and experimentation, and Snowflake for our data warehouse

What we're looking for:

- You have at least 8 months of web development work experience, preferably with exposure to a dynamic, startup or scaleup environment
- You have experience working with a modern frontend JS framework (ex. React, Vue, Angular), and have worked with web servers
- You learn quickly, regardless of the languages and technologies used
- You have experience taking ownership and shipping entire features end-to-end
- You thrive on decoding intricate problems with logical, well-reasoned solutions
- You are interested in working on both the frontend and backend components of features
- You are interested in working with React on the frontend and Python on the backend

What We Offer:

- Home Office Setup Allowance: \$300 one-time
- Friday UberEats Allowance: \$25/week
- Learning & Development Allowance: \$300/ per term
- Fitness/Wellness Allowance: \$120/per term

Candidates can be based anywhere in Canada, provided they maintain a minimum 6-hour overlap with the Eastern Time Zone and are available to work a 40-hour work week.

We're a remote-first company, but you're always welcome to join us at our head office on 260 Queen Street West in Toronto. We also host virtual and in-person

socials where interns can connect, play games, and meet others - including company - wide game nights and events. While optional, these are great ways to build connections and make the most of your [Super.com](#) experience.

At [Super.com](#), we are proud to leverage cutting-edge artificial intelligence (AI) technology to make our hiring process smarter, faster, and more inclusive. By integrating AI tools into our recruitment, we enhance our ability to identify top talent efficiently while promoting fairness and consistency for every applicant.

[Super.com](#) is an equal opportunity employer. We do not discriminate on the basis of race, religion, color, national origin, gender, sexual orientation, age, marital status, veteran status, or disability status.

Accommodations are available on request for candidates taking part in all aspects of the selection process. If needed, please notify your Talent Acquisition Partner.
