OverviewApplication

At [Super.com](#), we're on a mission to help people save more, earn more, and get more out of life. That goes for both our customers and our team.

We are more than a [fast-paced, high-growth tech company](#); we care about our people and take career progression seriously. This is your career and our aim is to supercharge it [through the people, the work, and the programs](#) that fuel who we are.

At [Super.com](#), we celebrate and reward our high performers. [Follow this link to learn more about our Internship Scholarship Program](#) and how you can further benefit from a work engagement with us. We have successfully hosted over 100 engineering internships, and always have our interns working alongside our full-time developers on core projects.

Term: This internship is for the Winter Term: **January 4 - April 30, 2027**

What's it like to intern at [Super.com](#)?

Interning at [Super.com](#) is an exciting chance to dive into the world of tech and startups, work on real projects, and learn a ton along the way. From day one, interns are fully part of the team - contributing to work that actually ships and gets used. It's a fast-moving yet super supportive environment where you're encouraged to ask questions, try new things, and grow through hands-on experience. Many interns say it's the most they've learned in such a short time! Even though we're remote, the culture is fun, collaborative, and well-connected- you'll be included in team meetings, Slack chats, and social events, so you'll never feel like you're doing this alone.

About this role

We are looking for an Infrastructure Engineering Intern with 4-16 months of experience to join our infrastructure engineering team. Our team is responsible for the infrastructure around building, deploying, and monitoring our services, databases, and caches.

What you'll be working on:

- Work with cutting edge infrastructure tools like Docker, Kubernetes, Terraform, Helm, and Istio
- Accelerate development across the company with faster, safer, and more frequent deploys
- Meaningfully improve developer happiness and productivity across the company with better development tools and workflows
- Contribute directly to the bottom line with cost savings initiatives and optimizations
- Catch errors and performance issues early with automated monitoring and alerting

Our Tech:

- Amazon Web Services (AWS)
- Tens of containerized microservices written in Python and/or JS processing a total of 15k+ requests per second
- Kubernetes for deploying services

- Infrastructure as Code in Terraform and Helm
- Datadog and [Incident.IO](#) for logging, monitoring, and alerting
- Postgres for storage and Redis for caching
- Gitlab for version control and CI/CD
- Python, Bash, and Docker for local development workflows and CI/CD jobs

What we're looking for:

- You have experience and comfort with POSIX-based operating systems
- You've used docker before and understand what it is and what problems it solves
- You have some knowledge of how networked services in the cloud work: VPC, IP, TCP, DNS, HTTP, etc.
- You abhor repetitive manual processes and are excited to automate them away
- You have a sixth sense for spotting waste (in money, time, CPU cycles) and eliminating it
- You learn quickly, regardless of the languages and technologies used

What We Offer:

- Home Office Setup Allowance: \$300 one-time
- Friday UberEats Allowance: \$25/week
- Learning & Development Allowance: \$300/ per term
- Fitness/Wellness Allowance: \$120/per term

Candidates can be based anywhere in Canada, provided they maintain a minimum 6-hour overlap with the Eastern Time Zone and are available to work a 40-hour work week.

We're a remote-first company, but you're always welcome to join us at our head office on 260 Queen Street West in Toronto. We also host virtual and in-person socials where interns can connect, play games, and meet others - including company - wide game nights and events. While optional, these are great ways to build connections and make the most of your [Super.com](#) experience.

At [Super.com](#), we are proud to leverage cutting-edge artificial intelligence (AI) technology to make our hiring process smarter, faster, and more inclusive. By

integrating AI tools into our recruitment, we enhance our ability to identify top talent efficiently while promoting fairness and consistency for every applicant.

[Super.com](#) is an equal opportunity employer. We do not discriminate on the basis of race, religion, color, national origin, gender, sexual orientation, age, marital status, veteran status, or disability status.

Accommodations are available on request for candidates taking part in all aspects of the selection process. If needed, please notify your Talent Acquisition Partner.
