### Previously worked at

uploading tab.) Please **indicate** in your resume or a cover letter how many months you are available for.

At this time, Ericsson Canada Inc. does not provide immigration assistance/sponsorship now or in the future for this position.

### About this opportunity:

As the tech firm that was instrumental in creating the mobile world, and with more than 54,000 patents to our name, we've made it our business to make a mark. When joining our team at Ericsson you are empowered to learn, lead and perform at your best, shaping the future of technology and communication. This is a place where you're welcomed as your own perfectly unique self, and celebrated for the skills, talent, and perspective you bring to the team. Come and be where it begins. Four types of roles are available — during the interview, we will discuss which best fits your interests:

- 5G Software Developer — develop, debug, and test 5G baseband Layer 2 software features
- Tools Developer — build command-line, web-based, log analysis, and software management tools
- Computer Science / Data Science Developer — apply statistical and AI/ML methods to time-series

[Skip to main content](#) [ature verification](#)

- Computer Science Developer (Analytics & APIs) — build

2. Developer

3. Software Engineer

4. Senior Software Engineer

5. Software Development Engineer

## What you will do:

- Collaborate with colleagues using Agile ways of working
- Develop real-time 5G base station software
- Apply AI/ML skills to development work
- Develop and code automated 5G test cases and test tools
- Perform software feature and integration testing on 5G lab equipment
- Work in 5G simulations, including signal processing with AI/ML
- Develop command-line and web-based tools to support software development
- Investigate and help resolve issues found during testing
- Generate test data for design validation
- Troubleshoot and resolve issues within the test environment

## The skills you bring:

- Academic background in Computer Science, Software Engineering, Communications Engineering, Electrical Engineering, or a related field
- Currently working toward a bachelor's, master's, or doctoral degree (any co-op term level welcome)
- Strong interpersonal skills:

Skip to main content self-directed, organized, detail-oriented, and adaptable

- Programming experience in any of: Python, Java, JavaScript, TypeScript, C/C++, Perl, Java SpringBoot, or HTML/CSS
- Familiarity with Linux, Gerrit, GitHub, Jenkins, Django, or Angular is an asset
- Knowledge of HTTP & RESTful frameworks, database fundamentals, Kubernetes, or Docker is an asset
- General knowledge of LTE and/or 5G wireless protocols is an asset
- For Data Science roles: proficiency in Python data science libraries (pandas, numpy, scipy, statsmodels) and experience with time-series analysis
- For Analytics/API roles: experience with REST API frameworks (FastAPI, Flask, or similar); familiarity with cloud platforms (AWS) and containerization is a plus

### Eligibility requirements:

- 2.7+ GPA or equivalent , Uploading an unofficial copy of your transcript
- Actively enrolled in an accredited undergraduate, master's, or PhD on a full-time basis at a four-year college or university at the time of the co-op
- Be available to work 40 hours per
