Intern, Fullstack Developer (Python) - Winter Semester 2027

Apply

Montréal, Quebec, Canada

About AlayaCare

At AlayaCare, we're more than just a fast-growing SaaS company — we're a team of people passionate about transforming home healthcare. Our cloud-based platform empowers care providers around the world to deliver better outcomes for their clients.

With 650+ employees across Canada, the US, Australia, and Brazil, we're united by a shared mission and a strong culture of transparency, growth, and human connection. Whether you're early in your career or a seasoned expert, AlayaCare offers the opportunity to grow your impact, your skills, and your career.

About the Role

As an Fullstack Developer Intern (Python, Vue.js & RESTful APIs), you'll work closely with experienced developers and product team members to contribute to real product features on the AlayaCare Cloud platform, a 24/7 SaaS platform supporting more than 13 million care visits every month and processing over 5 billion HTTP requests monthly across multiple regions.

Throughout your internship, you'll contribute to meaningful projects while learning modern development practices, tools, and workflows. You'll be supported by mentors who will help you develop both your technical abilities and professional skills.

What You'll Do

- Assist in designing, coding, testing, and debugging software features.
- Use GenAI tools to help plan, generate, and test features.
- Pair-program with senior developers and participate in code reviews to learn best practices.
- Write and maintain automated tests with guidance from team members.
- Help investigate, reproduce, and resolve bugs under supervision

• Learn and apply

CI/CD, containerization, and monitoring.

ing AI Agents,

What You Bring to the Team

- Familiarity with at least one programming language (e.g., Python, TypeScript, JavaScript, or similar).
- Highly motivated to learn development tools and workflows such as Git, CI/CD pipelines, and Docker.
- Curiosity about current industry trends in technology, performance, and software development practices to deliver business results.
- Strong communication skills and the ability to collaborate with both technical and non-technical teammates.
- Interest in developing yourself as a full stack developer as you'll implement in both Front-End and Back-End code.
- Bilingual in French and English is considered an asset.

Why Join AlayaCare?

Work With Purpose

At AlayaCare, you'll help build technology that empowers care providers and improves outcomes for patients and families. Every line of code and every customer interaction contributes to making care more connected, accessible, and human.

Grow in a High-Trust Culture

We believe in transparency, feedback, and assuming positive intent. Here, you'll feel safe to share your ideas and career goals, and be supported to achieve them through mentorship, career mobility, and a promote-from-within philosophy.

Inclusive by Design

We celebrate diverse perspectives and foster belonging through our DEIB initiatives. Employee-led events, summits, and social activities — both in-person and virtual — create meaningful connections across our global teams.
